PROFESSIONAL SUMMARY

IT support and systems-focused professional with hands-on experience building and managing segmented homelab infrastructure, deploying Linux-based servers, and configuring firewall, NAT, VLAN, and VPN environments. Strong troubleshooting mindset with structured root-cause analysis approach and documented workflows.

TECHNICAL SKILLS

Networking: IP addressing, subnetting fundamentals, ports & protocols, DNS, NAT, VLAN segmentation, firewall rules, WireGuard VPN

Systems: Windows troubleshooting (accounts, drivers, permissions, Event Viewer), Linux CLI fundamentals, macOS VM testing

Infrastructure: OPNsense firewall, Raspberry Pi server deployment, VirtualBox VMs, local DNS routing, service monitoring

Tools: GitHub, HTML, Python, Termux, Supabase, Git

Hardware: SSD/HDD diagnostics, backups, peripheral configuration, driver troubleshooting

HANDS-ON TECHNICAL PROJECTS

- **Homelab Infrastructure (OPNsense):** Designed segmented network with VLAN isolation, NAT, firewall rules, and secure WireGuard VPN access.
- **Raspberry Pi 4 Production Server:** Deployed Linux-based web server hosting portfolio; configured local DNS resolution and service monitoring.
- **Virtual Lab Environment:** Built Linux VM lab for system administration practice, log analysis, and controlled network testing.

PROFESSIONAL EXPERIENCE

2nd Family Dogs – Shift Lead (2021–Present)

- Led teams in high-pressure environments and emergency scenarios.
- Maintained accurate documentation and incident reporting.
- Resolved operational issues using structured troubleshooting methods.

Tandem Bagel – Prep Cook (2019–2022)

- Followed structured workflows and maintained operational accuracy.

EDUCATION & CERTIFICATIONS

Bachelor of Arts – Visual Arts, Marlboro College

Google IT Support Professional Certificate – Coursera

Certifications In Progress: Cisco CCNA, CompTIA Security+, CompTIA Linux+
